Great Scotland yard, Whitehall.

NOTICE.—PATENT PORTLAND CEMENT. The CO-PARTNERSHIP lately subsisting between ROBINS, ASPDIN, and COX, having been DISSOLVED on the 7th day of November last, by a decree of his Honour the Vice-Chancellor Turner, and an injunction granted, restraining William Aspdin, then of Ormo House, Northfleet, Kent, from intermeddling with or receiving or disposing of any of the moneys, property, or assets of the said late partnership, and from using or adopting the name thereof for any purpose whatsoever, Messrs. ROBINS and COX, being alone entitled to wind up the affairs of the late Co-partnership, request the Creditors of the late Firm forthwith to render their accounts, that the same may be discharged; and the Debtors to the late Firm will be pleased, at their convenience, to pay their accounts, either at the Cement Works, Northfleet, Kent, or at Great Scotland yard, Whitehall, where Messrs. ROBINS and COX continue to carry on their Manufacture and Trade in Portland Cement in connection with Messrs. Goodwin and Schmidt, under the style or firm of ROBINS and COMPANY.

ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes, is a quick-setting Cement that requires no colouring.—Sold exclusively by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster; and Seel-street, Liverpool.

KEENE'S and PARIAN CEMENTS and FRENCH PLASTER for internal uses.—These will become hard enough to receive dry quickly, and can be painted upon within a few days. Made and sold by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster.

PORTLAND CEMENT is the cheapest, because the best Cement for external uses. As a stucco, it requires no colouring, does not vegetate, and is not affected by frost. As a mortar for brickwork, it may be mixed with three to four parts of sand; and, for concrete, it will carry ten to twelve times its volume of sand and gravel.—Manufactured by JOHN BAZLEY WHITE and SONS, 17, Millbank-street, Westminster, and Seel-street, Liverpool.

ROMAN and OTHER CEMENTS. Manufactured by J. M. BLASHFIELD, successor to the Patentees, PARKER and WYATT, who, in 1796, first introduced PARKER'S ROMAN CEMENT; also Terras and Portland Cements, English and French Plaster, Terra Cotta Chimney Pots, Trusses &c.

Manufactory, Mill Wall, Poplar; Depôts, Commercial-road, Lambeth; and Paddington-basin.

POZZOLANA, from the MINE of ST. PAUL, at ROME.—ARCHITECTS, CONTRACTORS, BUILDERS, and OTHERS, constructing or repairing Docks, Quays, Walls, Foundations of Houses, or other Works, where the object is to prevent the filtration of water, are strongly recommended to USE POZZOLANA, which is the only true cement that guarantees perfect and durable solidity to hydraulic works. Mortar made of Lime and Pozzolana is particularly recommended in Building Houses; the walls are then impervious to damp. When common mortar is used, the damp of the atmosphere in rainy weather attracts the saline particles in the sand, which evaporating, produce a moisture in the interior of the houses, equally injurious to the furniture and to the health of the inhabitants. Whole Cargoes of Pozzolana delivered to any port of the United Kingdom on very moderate terms, and large or small quantities in London.—Apply, Messrs. SNIDER, PELLEGRINI, and Co. 113, Fenchurch-street, London.

PORTLAND CEMENT.—CHARLES RICHARDSON has the greatest confidence in introducing to the trade the above superior CEMENT, being of uniform colour and quality in desirableness never before obtained in Portland Cement. It possesses extraordinary, unconditional qualities, under the action of frost and heat, and to more durable than any other Cement; and, when made, requires no grinding or mixing, with which the ambiguous hydraulic property in stone is not upon the first moment of the day for ready use; all the above qualities are provable. It is manufactured on the only principle Portland Cement can be and ought to be manufactured, and is by the originator and only patentee in the kingdom, for sale by H. GREAVES, Esq. at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

PORTLAND CEMENT.—THOMAS FREEN and CO. having completed their works at WOULDHAM-ON-THE-MEDWAY for the manufacture of PORTLAND CEMENT, beg to inform their friends and the public that they are now ready to supply them with cement of superior quality on reasonable terms.—Roman Cement and Plaster of Paris Works, Tenney Wharf, Camel-road, Kingsland-road.

PORTLAND CEMENT.—JAMES WESTON, having commenced manufacturing the above Cement, begs to inform the trade in general that he can supply them with any quantity they may require, either at his Works, Mill-wall, Poplar; 24, Andrew's Wharf, Earl-street, Blackfriars; or Middle Scotland-yard, Whitehall. Manufacturer of Roman, Lias, and Medina Cements, French and English Plaster, &c.

PORTLAND CEMENT.—The difficulty of procuring this valuable Cement of uniform colour and strength, has hitherto prevented its more general use. Consumers and Builders will find that these two important qualities may be depended on with the greatest certainty in that manufactured by CHARLES J. HILTON, at his Roman and Portland Cement and Plaster of Paris Works, Faversham, Kent, at which place, as also at his Wharf in London, 6, Upper Thames-street, Otto, and Great Scotland-yard, Westminster, orders can now be received to any extent.

PERMANENT STUCCO WASH, WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.

As used at St. George's Hospital, Hyde Park Corner.

JOHNS and COX having effected some important improvements in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as possessing every advantage over the common Lime Wash or Water Colour for STUCCO or BRICK WORK. It is a Stone Colour, but may be tinted to any other.—DOES NOT WASH OFF.—is perfectly dry in twenty-four hours, and, being a non-absorbent, is admirably adapted for Railway Stations, Gaols, Workhouses, Barracks, Schools, Prisons, &c. One coat will cover 150 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its suitableness for internal as well as external work, supersedes plaster in almost every instance of use. It has no caustic qualities; may be painted or papered in a few days; never blisters, cracks, or vegetates; soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds and external work generally. Numerous testimonials, prospectuses, and every information may be obtained, on application to the Sole Agents, PHILIP HARE and Co. at the Warehouse, 22, Steel-yard, Upper Thames-street. A liberal allowance to wholesale dealers.

PARIAN CEMENT for internal use, to be PAINTED IN A FEW HOURS AND PAPERED WITHIN A COUPLE OF DAYS.—CHARLES FRANCIS and SONS, Patentees, and Manufacturers of Roman and Portland Cement, &c. &c. Nine Elms, London.

MEDINA (ROMAN) CEMENT.—The material of which this cement is made is obtained in the Isle of Wight. It has all the properties of the Sheppy Stone, but is much better adapted to engineering works, from the rapidity with which it sets and hardens under water. It has been long used at the great Break water at Cherbourg; in a smaller work at Alderney; and at Dover New Pier, to make that masonry. The founda-tion of the centre pier of the Tubular Bridge at Menai Straits is laid in Medina Cement. A new groyne at Sandown Bay, Isle of Wight, has been constructed of no other material but this cement and ballast. The work extends 300 feet into the sea, and is exposed to the most violent gales of the Channel, in a position where every former attempt has been repeatedly washed away. The inconvenience of the varied qualities of Roman Cements are superseded by the use of this improved manufacture.

CHAS. FRANCIS and SONS, Nine Elms, London; or West Medina Mill, Newport, Isle of Wight.

Agent for Southampton, R. L. FLEDER, American Wharf.

STEPHENS'S LIQUID OAK, MAHOGANY, and SATIN WOOD STAINS, for staining various sorts of Interior Woods, so as to give them the appearance and character of the more costly and ornamental kinds. In the BUILDING and DECORATING CHURCHES, where it is desirable to give to the cheaper kind of woods the appearance of antique Oak, or to make Deal assume the character of Oak Panelling, whereby the effect of the more costly may be produced by the use of a cheaper material, these Stains will be found more effective than any means hitherto employed. For the repeated Timbers of the inside of the Roofs of Churches, by brushing them over with the Stains, which operation is very rapidly performed, a more economically effected, the appearance of an ancient roof will be produced. For colouring the backs of the seats, pews, the fronts of galleries, the pulpit, &c. it is equally advantageous.—Prepared by HENRY STEPHENS, and may be obtained at 34, Somerford-street, and at the Office of "The Builder," at both which places may be had the proper Varnish and Size, with directions for use.
